

Copilot Cowork: Our First 30 Days

Copilot Cowork — the M365 layer where AI does the work, not just suggests it. The room came to see what was real.

Presented by: Ashley Pyle & Sean Van de Riet

Chatbots suggest. Cowork actually does.

Same M365 you already live in. New layer that takes action — drafts the email, builds the deck, files it where it belongs.

◇ COPILOT

Suggests.

You finish it.

◇ COWORK

Does.

It shows up done.

~30 days in — what we have learned so far.

Where we started with our 35-person pilot.

01**Inbox triage**

Surfaces priorities. Drafts replies.

02**Meeting prep**

One-page brief with full context.

03**Client deliverables**

Decks, demos, guides. On brand.

04**Executive routines**

Briefs and wrap-ups, on schedule.

If your team lives in Outlook, Teams, and OneDrive/SharePoint — these four are where it pays back fastest.

Most people don't yet have this map.

Three things. One stack. Different jobs.

COPILOT

IN-APP HELP

Helps with the doc in front of you. Lives inside Word, Excel, Outlook, PPT, OneNote.

COWORK

THE WORKSPACE

Does the work across your whole M365. Memory, files, skills, scheduled tasks + workflows.

AGENTS

THEY FINISH THINGS

Go off and ship the work on their own. Inbox triage, research, drafts — done while you're elsewhere.

Once you can name the difference, where work belongs becomes obvious.

GADELLNET

THE SHIFT

Same team. Bigger game.

Cowork doesn't replace your people, it raises capability.

BEFORE COWORK

Reactive.

Siloed.

Behind on email.

Buried in busywork.

WITH COWORK

Proactive.

Connected.

Ahead of decisions.

Building what matters.

Same hours. Higher ceiling.

swipe →

GADELLNET

BUILT IN • DAY ONE

You don't have to build all of it.

Cowork ships with 13 built-in skills that already handle most of the workday.

Email & Comms

Drafts, triages, sends. Newsletters + updates.

Doc Builder

Word. Excel. PowerPoint. PDF.

Calendar & Meetings

Schedules, preps, and follows up.

Research

Your org data and the open web.

Daily Briefing

Morning snapshot of what's ahead.

Adaptive Cards

Interactive cards in the flow of work.

+ Custom Skills • Build up to 20 of your own

WHAT WE LEARNED

Microsoft Innovation Hub · STL Community Day · St. Louis · May 1

The constraint isn't the technology.

It's business process knowledge to prove and scale use cases (especially when this tech is Frontier & changing rapidly!)

Cowork warm-up prompt.

Save this for when you get access to Copilot Cowork.

PROMPT 01 · THE WARM-UP

**“Look at my calendar, inbox,
and Teams from the past week.
Surface 3–5 concrete things
you can take off my plate —
then do the easiest one now.”**

Cowork will walk you through next steps on what to delegate.

Cowork big-idea prompt.

Save this for when you get access to Copilot Cowork.

PROMPT 02 · THE BIG ASK

“Study my last 30 days of calendar, inbox, and Teams. Pitch me 5 ambitious ways to use Cowork that I wouldn't have thought of.”

It tells you how the tool sees you — not how you see the tool.
